INTERNSHIP

Cloud Intern – AWS (2025)

Worked with EC2, S3, RDS, IAM, and VPC for deploying and managing resources while gaining experience in cloud infrastructure, networking, and secure resource management also monitored and optimized system performance, ensuring scalability and cost efficiency.

Full-Stack Intern – Better Tomorrow (MERN Stack, 2025)

Built dynamic web applications using MongoDB, Express.js, React, and Node.js while developing and integrating RESTful APIs for seamless data handling.

PROJECTS

Student Management System on AWS Cloud

Developed and deployed a cloud-native student management application using Apache + PHP on EC2 with MySQL on RDS, designing a secure VPC (public/private subnets, security groups) to enable reliable and secure EC2–RDS data integration.

LEAFLYZE – AI-Powered Plant Disease Detection System:

Developed a CNN-based model for classifying plant diseases with 90%+ accuracy and integrated FastAPI backend with Streamlit frontend and deployed on Render.

Edumind Assistant:

Developed a machine learning model using Random Forest to predict CGPA with 85–90% accuracy, built and deployed a Streamlit-based full-stack application with real-time data visualization, chatbot integration, and cloud deployment

SKILLS

Languages: Java, C++, SQL, Python

Cloud & Databases: AWS , MySQL, MongoDB, Cloud Computing Concepts

Frontend: HTML, CSS, React, Tailwind CSS
